

GILBERT RABUT TSURWA – FRONT-END WEB DEVELOPER

SUMMARY

I am a dedicated and disciplined front end web developer, looking for new opportunities in web development, and/or software engineering. I specialise in front end web development, but over time, I fully intend on exploring back-end development, and a little bit of UI/UX design. My forté however, is on the front-end; particularly with Javascript

Although I am familiar and have used many development tools and languages, my strongest ones include: VueJS as my front-end framework of choice along with MongoDB for creating and maintaining databases for web applications. I adapt and can learn other technologies and languages quickly as needed to get the job done.

Currently looking for a position with an employer with projects to make the best use of my existing skills, help me develop new ones, and assist in my professional development as a web developer

TECHNICAL SKILLS

- **Web Development:** HTML, CSS, PHP, JavaScript, TypeScript, VueJS, Nuxt, React, Svelte, WordPress
- **Productivity Software:** VSCode, Brackets, Atom & Linux
- **Version Control:** Git & GitHub
- **Databases:** MongoDB, MySQL

CERTIFICATIONS

- **Web Development Bootcamp** by Colt Steele (Completed July 2019)
- **Build Responsive Websites with HTML5 & CSS3** by Jonas Schmedtmann (Completed November 2018)
- **Advanced CSS & Sass: Flexbox, Grid, Animations and more** by Jonas Schmedtmann (Completed January 2020)
- **The Complete Javascript Course 2020** by Jonas Schmedtmann of (Completed Jan 2020)
- **Vue JS 2 - The Complete Guide (incl. Vue Router & Vuex)** by Max Schwarzmuller (Completed Jun 2020)

EXPERIENCE

SHENANDOAH UNIVERSITY - WINCHESTER, VA

JAN 2021 - PRESENT

Junior Web Developer

Responsibilities

- Assisting my senior developer in maintaining the health of the university site, using WordPress, CSS, PHP, MySQL and Git as the main pillars of our workflow
- Solely responsible for keeping the university's conservatory site up to date.
 - Updating Plugins

- Maintaining WordPress from the backend
- Refactoring CSS
- Assist in large projects such as code overhaul, implementing new plugin features, etcetera.
- Evaluating code to ensure it meets industry standards, is valid, is properly structured, and is compatible with browsers, devices, or operating systems.
- Doing a regular inspection of the university site: searching for bugs, testing performance, etc.
- Making sure that I am constantly keeping up to date with general technologies, as well as more nuanced ones that our website runs on.

AEONNOVA CONSULTING GROUP - HOUSTON, TX

OCT 2018 - JAN 2020

Web Developer Intern (Remote)

Responsibilities

- Website designing, developing and maintaining and updating.
- Modify templates using HTML, CSS & JavaScript.
- Conferring with teams to resolve conflicts, prioritize needs, develop content criteria, or choose solutions.
- Evaluating code to ensure it meets industry standards, is valid, is properly structured, and is compatible with browsers, devices, or operating systems.
- Coordinated with other developers and software professionals to understand the software requirements, deliverables and timeline.
- Created and documented software tools required by other developers.
- Contributed to technical design documentation.

THE COLLEGE OF SAINT SCHOLASTICA - DULUTH, MN

JUL 2018 – DEC 2018

IT Support Specialist

Responsibilities

- Provide an organization with a full range of technical support services for networks, workstations, remote computing, communications, and Internet needs.
- Help students, staff and faculty with technology questions or problems.
- Troubleshoot audio video equipment problems and do a report every night.
- Track computer problems in the database.
- Identify IT challenges and opportunities for improvements; make recommendations and implement solutions.
- Keep the computer lab clean by doing cleaning and organization every night.
- Report equipment problems by putting work orders and troubleshoot problems.
- Replenish supplies and inform the manager when we need to re-order ink, paper, and other supplies for most of the printers in the school.

MISCELLANEOUS

Attended the Smashing Magazine Conference that took place in San Francisco on 20-23 June 2022. This was my very first conference and hopefully not the last
